SUMMARY

Software engineer and M.Tech IT graduate building real-time backends, AI applications, and distributed ML systems. Uses Codex and Claude to turn requirements into working software through implementation, debugging, and validation.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL
Backend: Node.js, FastAPI, REST APIs, PostgreSQL, WebSockets, SQLite
AI & Systems: LangGraph, LangChain, RAG, PyTorch, Ray, Gemini
Cloud & Tools: AWS, GCP, Cloudflare Workers, Durable Objects, D1, Docker, Git
AI-Assisted Development: Codex, Claude; requirements breakdown, implementation, debugging, code review

SELECTED PROJECTS

CodeClash | Real-Time Multiplayer Coding Platform

TypeScript, React, Cloudflare Workers, Durable Objects, WebSockets, D1 | *GitHub* | *code-clash.com*

- Built 1v1 matchmaking, ready checks, and reconnectable match state with Cloudflare Durable Objects and WebSockets.
- Integrated GitHub authentication and Cloudflare D1 persistence for accounts and match history.
- Added Monaco and Pyodide/WebAssembly for browser-side Python execution and example checks in the casual beta.

HQDE | Distributed Ensemble Learning Framework

Python, Ray, PyTorch, FedAvg, Adaptive Quantization | *GitHub* | *PyPI*

- Published a Ray/PyTorch package with persistent worker model/optimizer state, ensemble training, and FedAvg-style rounds.
- Implemented adaptive delta quantization with error feedback; reduced model-update communication by approximately 3.05x versus matched FP32 FedAvg.
- Evaluated five image datasets; ensembles improved accuracy on four versus a centralized baseline, by up to 2.62 points.

JanSeva AI | Multilingual RAG Assistant

TypeScript, Gemini, RAG, AWS Lambda, API Gateway | *GitHub*

- Built a multilingual RAG assistant over 3,400+ government schemes, grounding responses in retrieved eligibility, benefits, and document requirements.
- Integrated conversation history and dynamic scheme-specific forms; deployed with AWS Lambda, API Gateway, S3, and CloudFront.

VSFeed | Published VS Code Extension

TypeScript, JavaScript, VS Code Extension API, Webview API | *GitHub* | *Marketplace*

- Published a TypeScript VS Code extension with 700+ downloads across Visual Studio Marketplace and Open VSX; built a webview panel with integrated-browser site launching.
- Implemented workspace-persisted shortcuts, launch-history navigation, keyboard commands, and timed focus controls.

EXPERIENCE

University of Hyderabad | Teaching Assistant

Web Development (IT) Lab | Jan - Jun 2026

- Guided full-stack projects and design decisions; recommended GenAI tools for specific tasks and supported project evaluation.

Java OOP Lab | Jul - Dec 2025

- Designed lab questions, evaluated submissions, and guided students on object-oriented programming and debugging.

EDUCATION

University of Hyderabad | M.Tech, Information Technology | 2026 | CGPA: 8.68
Modern Education Society College of Engineering | B.E., Computer Engineering | 2023
Honors in AI/ML | CGPA: 8.85

ACHIEVEMENTS

Data Science Conference Hackathon: Winner (2026) | AI4Bharat AWS Hackathon: Finalist | Finalist in 10+ hackathons held across India.
